MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

1 Description of business

May & Baker Nigeria Plc. was incorporated as a private limited liability company in Nigeria on December 4, 1944 and commenced business on the same date. It was listed on the Nigerian stock exchange in 1994. The company is involved in the manufacture, sale and distribution of human pharmaceuticals, human vaccines and consumer products. Registered business address is 3/5 Sapara street, Industrial Estate, Ikeja, Lagos, Nigeria

2. Basis of preparation

2.1 Statement of compliance

These consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRSs) as issued by the International Accounting Standards Board (IASB), and in compliance with Financial Reporting Council of Nigeria Act No 6 2011. Additional information required by national regulations has been included where appropriate.

These consolidated financial statements comprise of the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of financial position, the consolidated and separate statement of changes in equity, the consolidated and separate statement of cashflows and notes to the consolidated financial statements.

2.2 Going concern status

These consolidated financial statements have been prepared on a going concern basis, which assumes that the entity will be able to meet its financial obligations as at when they fall due. There are no significant financial obligations that will impact on the entity's resources which will affect the going concern of the entity. Management is satisfied that the entity has adequate resources to continue in operational existence for the foreseeable future. For this reason, the going concern basis has been adopted in preparing these consolidated financial statements.

2.3 Basis of measurement

These consolidated financial statements have been prepared in accordance with the going concern principle under the historical cost convention, except for financial assets (liabilities) which were measured at fair value. The liability for defined benefit obligations is recognized as the present value of the defined benefit obligation less the total of the plan assets, plus unrecognized actuarial gains, less unrecognized past service cost and unrecognized actuarial losses while the plan assets for defined benefit obligations are measured at fair value.

These consolidated financial statements are presented in the Nigerian Naira (NGN), which is the Company's functional currency for presentation.

2.3.1 Functional and presentation currency

Items included in these consolidated financial statements are measured using the currency of the primary economic environment in which the Group operates ("the functional currency"). The consolidated financial statements are presented in Nigerian Naira (N) which is the Group's functional currency and presentation currency.

2.4 Use of estimates and judgements

The preparation of these consolidated financial statements in conformity with IFRS requires the use of certain critical accounting estimates, it also requires management to exercise its judgment in the process of applying the company's accounting policies. Changes in assumptions may have a significant impact on these consolidated financial statements in the period the assumptions changed. Management believes that the underlying assumptions are appropriate and therefore the Group's financial statements present the financial position and results fairly.

2.5. Summary of Standards and Interpretations effective for the first time

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

IFRIC 23 Uncertainty over Income Tax Treatments

The interpretation specifies how an entity should reflect the effects of uncertainties in accounting for income taxes.

2.5.1 Standards Issued and Effective on or after 1 January 2022

a) IFRS 17 Insurance Contracts

IFRS 17 creates one accounting model for all insurance contracts in all jurisdictions that apply IFRS. This standard replaces IFRS 4 – Insurance contracts.

The key principles in IFRS 17 are that an entity:

- a) identifies as insurance contracts those contracts under which the entity accepts significant insurance risk from another party (the policyholder) by agreeing to compensate the policyholder if a specified uncertain, future event (the insured event) adversely affects the policyholder;
- b) separates specified embedded derivatives, distinct investment components and distinct performance obligations from the insurance contracts;
- c) divides the contracts into groups it will recognise and measure;
- d) recognises and measures groups of insurance contracts at a risk-adjusted present value of the future cash flows (the fulfilment cash flows) that incorporates all the available information about the fulfilment cash flows in a way that is consistent with observable market information plus (if this value is a liability) or minus (if this value is an asset) an amount representing the unearned profit in the group of contracts (the contractual service margin);
- e) recognises the profit from a group of insurance contracts over the period the entity provides insurance coverage, and as the entity is released from risk, if a group of contracts is or becomes loss-making, an entity recognises the loss immediately;
- f) presents separately insurance revenue, insurance service expenses and insurance finance income or expenses;
- g) discloses information to enable users of financial statements to assess the effect that contracts within the scope of IFRS 17 have on the financial position, financial performance and cash flows of the entity. To do this, an entity discloses qualitative and quantitative information about:
 - the amounts recognised in its financial statements from insurance contracts;
 - the significant judgements, and changes in those judgements, made when applying the Standard; and
 - the nature and extent of the risks from contracts within the scope of this Standard.

2.5.2 Narrow Scope Amendments deferred until further notice

a) IFRS 10 consolidated financial statements

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

b) IAS 28 Investments in Associates and Joint Ventures

Sale or Contribution of Assets between an Investor and its Associate or Joint Venture (Amendments to IFRS 10 and IAS 28): Narrow scope amendment to address an acknowledged inconsistency between the requirements in IFRS 10 and those in IAS 28 (2011), in dealing with the sale or contribution of assets between an investor and its associate or joint venture.

2.5.3 New standards, amendments and interpretations issued but without an effective date

At the date of authorisation of these financial statements the following standards, amendments to

Amendments to IFRS 10 and IAS 28 consolidated financial statements and Investments in

Amends IFRS 10 consolidated financial statements and IAS 28 Investments in Associates and Joint

- Require full recognition in the investor's financial statements of gains and losses arising on the
- Require the partial recognition of gains and losses where the assets do not constitute a

These requirements apply regardless of the legal form of the transaction, e.g. whether the sale or

3 Significant accounting policies

The principal accounting policies adopted are set out below.

3.1 Foreign currency translation

Foreign currency transactions are booked in the functional currency of the Group (naira) at the exchange rate ruling on the date of transaction. Foreign currency monetary assets and liabilities are retranslated into the functional currency at rates of exchange ruling at the reporting period. Exchange differences are included in the Statement of profit or loss and other comprehensive income. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

3.2 Basis of consolidation

The consolidated financial statements incorporate the financial statements of the Company and entities controlled by the Company (its subsidiaries) made up to 31 December each year. Control is achieved where the Company has the power to govern the financial and operating policies of an investee entity so as to obtain benefits from its activities.

The results of subsidiary acquired or disposed of during the year are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate.

Where necessary, adjustments are made to the financial statements of subsidiaries to bring the accounting policies used into line with those used by the group. All intra-group transactions, balances, income and expenses are eliminated on consolidation.

3.3 Business combinations

Acquisitions of subsidiaries are accounted for using the acquisition method. The consideration for each acquisition is measured at the aggregate of the fair values (at the date of exchange) of assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for control of the acquire. Acquisition-related costs are recognised in profit or loss as incurred.

Where a business combination is achieved in stages, the Group's previously-held interests in the acquired entity are re-measured to fair value at the acquisition date (i.e. the date the Group attains control) and the resulting gain or loss, if any, is recognised in profit or loss. Amounts arising from

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

interests in the acquiree prior to the acquisition date that have previously been recognised in other comprehensive income are reclassified to profit or loss, where such treatment would be appropriate if that interest were disposed of.

The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under IFRS 3(2008) are recognised at their fair value at the acquisition date, except that:

- Deferred tax assets or liabilities and liabilities or assets related to employee benefit arrangements are recognised and measured in accordance with IAS 12 Income Taxes and IAS 19 Employee Benefits respectively;
- assets (or disposal groups) that are classified as held for sale in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations are measured in accordance with that Standard.

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period (see below), or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognised as of that date.

The measurement period is the period from the date of acquisition to the date the Group obtains complete information about facts and circumstances that existed as of the acquisition date, and is subject to a maximum of one year.

3.4 Revenue recognition

Revenue is measured at the fair value of the consideration received or receivable. Revenue is reduced for estimated customer returns, rebates and other similar allowances.

a) Sale of goods

Revenue from the sale of goods is recognised when the goods are delivered and titles have passed, at which time all the following conditions are satisfied:

- i the Group has transferred to the buyer the significant risks and rewards of ownership of the
- ii the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- iii the amount of revenue can be measured reliably;
- iv it is probable that the economic benefits associated with the transaction will flow to the Group;
- v the costs incurred or to be incurred in respect of the transaction can be measured reliably;
- vi the Group retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.

b) Interest income

Interest income from a financial asset is recognised when it is probable that the economic benefits will flow to the Group and the amount of income can be measured reliably. Interest income is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

3.5 Expenditure

Expenditure is recognised in respect of goods and services received when supplied in accordance with contractual terms. Provision is made when an obligation exists for a future liability in respect of a past event and where the amount of the obligation can be reliably estimated. Manufacturing start-up costs between validation and the achievement of normal production are expensed as incurred. Advertising and promotion expenditure is charged to profit or loss as incurred. Shipment costs on inter-company transfers are charged to cost of sales; distribution costs on sales to customers are included in distribution expenditure. Restructuring costs are recognised and provided for, where appropriate, in respect of the direct expenditure of a business reorganisation where the plans are sufficiently detailed and well advanced, and where appropriate communication to those affected has been undertaken.

3.6 Intangible assets

Intangible assets acquired separately

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortisation and accumulated impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Intangible assets with indefinite useful lives that are acquired separately are carried at cost less accumulated impairment losses.

Internally generated intangible assets - research and development expenditure

Expenditure on research activities is recognised as an expense in the period in which it is incurred. An internally-generated intangible asset arising from development (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible assets is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible assets are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

Intangible assets acquired in a business combination and recognised separately from goodwill are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

Subsequent to initial recognition, intangible assets acquired in a business combination are reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets that are acquired separately.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset, measured as the difference between the net disposal proceeds and the carrying amount of the asset, are recognised in profit or loss when the asset is derecognised.

3.7 Legal and other dispute

Provision is made for the anticipated settlement costs of legal or other disputes against the Group where an outflow of resources is considered probable and a reliable estimate can be made of the likely outcome. In addition, provision is made for legal or other expenses arising from claims received or other disputes. In respect of product liability claims related to certain products, there is sufficient history of claims made and settlements to enable management to make a reliable estimate of the provision required to cover un-asserted claims. The Group may become involved in legal proceedings, in respect of which it is not possible to make a reliable estimate of the expected financial effect, if any, that could result from ultimate resolution of the proceedings. In these cases, appropriate disclosure about such cases would be included but no provision would be made. Costs associated with claims made by the Group against third parties are charged to profit or loss as they are incurred. When the group is virtually certain of receiving reimbursement from a third party (in the form of insurance, a shared liability agreement etc.) to compensate for any lost financial benefit from such disputes, they should recognise a receivable as an asset.

3.8 Pensions and other post-employment benefits

Defined contribution scheme

The Group operates a defined contribution based retirement benefit scheme for its staff. In accordance with the provisions of the amended Pension Reform Act, 2014 the Company has instituted a Contributory Pension Scheme for its employees, where both the employees and the company contribute 7% and 11% of the employee total emoluments. The company's contribution under the scheme is charged to the profit and loss while employee contributions are funded through payroll deductions.

In addition to the pension scheme, the Company operates a gratuity scheme payable to employees that have served a minimum of five years of service. The benefits are calculated based on employees salary for each qualifying year. The Company discharges its obligation to employees once payment is made to the fund managers.

3.9 Property plant and equipment

Property, plant and equipment is carried in the consolidated statement of financial position at cost less accumulated depreciation and accumulated impairment.

The cost of acquisition comprises the acquisition price plus ancillary and subsequent acquisition costs, less any reduction received on the acquisition price. The cost of self-constructed property, plant and equipment comprises the direct cost of materials, direct manufacturing expenses, and appropriate allocations of material and manufacturing overheads. Where an obligation exists to dismantle or remove an asset or restore a site to its former condition at the end of its useful life, the present value of the related future payments is capitalized along with the cost of acquisition or construction upon completion and a corresponding liability is recognized.

If the construction phase of property, plant or equipment extends over a long period, the interest incurred on borrowed capital up to the date of completion is capitalized as part of the cost of acquisition or construction in accordance with IAS 23 (Borrowing Costs).

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

Expenses for the repair of property, plant and equipment, such as on-going maintenance costs, are normally recognized in profit or loss. The cost of acquisition or construction is capitalized if a repair (such as a complete overhaul of technical equipment) will result in future economic benefits.

Depreciation is recognised so as to write off the cost or valuation of assets less their residual values over their useful lives, using the straight-line method. Freehold land is not depreciated. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

The following depreciation periods, based on the estimated useful lives of the respective assets, are applied throughout the Group:

Class	Useful life (range)
Buildings	50 years
Plant, machinery and fittings	5 - 10 years
Office equipment and furniture	4 - 10 years
Trucks and motor vehicles	3 - 8 years

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

3.10 Financial instruments

a. Classification and measurement of financial assets

Financial assets, which include both debt and equity securities are measured at initial recognition at fair value, and are classified and subsequently measured at fair value through profit or loss (FVTPL), fair value through other comprehensive income (FVOCI) or amortised cost. Subsequent classification and measurement for debt securities is based on our business model for managing the financial instruments and the contractual cash flow characteristics of the instruments.

Debt instruments are measured at amortised cost if both of the following conditions are met and the

b. Business model assessment

The Group determines the business models at the level that best reflects how portfolios of financial assets are managed to achieve the its business objectives. Judgment is used in determining the business models, which is supported by relevant, objective evidence including:

- How the economic activities of the group's businesses generate benefits and how such economic activities are evaluated and reported to key management personnel;
- The significant risks affecting the performance of the group's businesses, for example, market risk, credit risk, or other risks and the activities undertaken to manage those risks; and
- Historical and future expectations of sales of the loans or securities portfolios managed as part of a business model.

The Group's business models fall into three categories, which are indicative of the key strategies used to generate returns:

- **Hold-to-Collect (HTC):** The objective of this business model is to hold loans and securities to collect contractual principal and interest cash flows. Sales are incidental to this objective and are expected to be insignificant or infrequent.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

- Hold-to-Collect-and-Sell (HTC&S): Both collecting contractual cash flows and sales are integral to achieving the objective of the business model.
- Other fair value business models: These business models are neither HTC nor HTC&S, and primarily represent business models where assets are held-for-trading or managed on a fair value basis.

c. SPPI assessment

Instruments held within a HTC or HTC&S business model are assessed to evaluate if their contractual cash flows are comprised of solely payments of principal and interest. SPPI payments are those which would typically be expected from basic lending arrangements. Principal amounts include par repayments from lending and financing arrangements, and interest primarily relates to basic lending returns, including compensation for credit risk and the time value of money associated with the principal amount outstanding over a period of time.

Interest can also include other basic lending risks and costs (for example, liquidity risk, servicing or administrative costs) associated with holding the financial asset for a period of time, and a profit margin.

Where the contractual terms introduce exposure to risk or variability of cash flows that are inconsistent with a basic lending arrangement, the related financial asset is classified and measured at FVTPL.

e. Investment securities

All investment securities are initially recorded at fair value and subsequently measured according to the respective classification. Prior to our adoption of IFRS 9, Investment securities were comprised of available-for sale securities and held-for-trading securities.

3.11 Financial liabilities

Initial recognition and measurements

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, payables, or as derivatives designated as hedging instruments in an effective hedge, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts.

3.12 Cash and cash equivalents

Cash and cash equivalents comprise cash and short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value. An investment with a maturity of three months or less is normally classified as being short-term. Cash and cash equivalents form part of the company's financial assets.

3.13 Trade and other receivables

Trade receivables are stated at fair value and subsequently measured at fair value through profit or loss, less provision for impairment. Impairment thereon are computed using the simplified IFRS 9

3.14 Trade and other payables

Trade and other payables are stated at their original invoiced value. The Directors consider the carrying amount of other payables to approximate their fair value.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

3.13 Impairment of financial assets

Financial assets are assessed for indicators of impairment at the end of each reporting period. Financial assets are considered to be impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been affected.

For AFS equity investments, a significant or prolonged decline in the fair value of the security below its cost is considered to be objective evidence of impairment.

For all other financial assets, objective evidence of impairment could include:

- significant financial difficulty of the issuer or counterparty; or
- breach of contract, such as a default or delinquency in interest or principal payments; or
- it becoming probable that the borrower will enter bankruptcy or financial re-organisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

For certain categories of financial assets, such as trade receivables, assets that are assessed not to be impaired individually are, in addition, assessed for impairment on a collective basis. Objective evidence of impairment for a portfolio of receivables could include the Group's past experience of collecting payments, an increase in the number of delayed payments in the portfolio past the average credit period of 30 days, as well as observable changes in national or local economic conditions that correlate with default on receivables.

For financial assets carried at amortised cost, the amount of the impairment loss recognised is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the financial asset's original effective interest rate.

For financial assets carried at cost, the amount of the impairment loss is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss will not be reversed in subsequent periods.

The carrying amount of the financial asset is reduced by the impairment loss directly for all financial assets with the exception of trade receivables, where the carrying amount is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognised in profit or loss.

When an AFS financial asset is considered to be impaired, cumulative gains or losses previously recognised in other comprehensive income are reclassified to profit or loss in the period.

For financial assets measured at amortised cost, if, in a subsequent period, the amount of the impairment loss decreases and the decrease can be related objectively to an event occurring after the impairment was recognised, the previously recognised impairment loss is reversed through profit or loss to the extent that the carrying amount of the investment at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

In respect of AFS equity securities, impairment losses previously recognised in profit or loss are not reversed through profit or loss. Any increase in fair value subsequent to an impairment loss is recognised in other comprehensive income and accumulated under the heading of investments revaluation reserve. In respect of AFS debt securities, impairment losses are subsequently reversed through profit or loss if an increase in the fair value of the investment can be objectively related to an event occurring after the recognition of the impairment loss.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

3.14 Derecognition of financial assets

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset in its entirety, the difference between the asset's carrying amount and the sum of the consideration received and receivable and the cumulative gain or loss that had been recognised in other comprehensive income and accumulated in equity is recognised in profit or loss.

On derecognition of a financial asset other than in its entirety (e.g. when the Group retains an option to repurchase part of a transferred asset), the Group allocates the previous carrying amount of the financial asset between the part it continues to recognise under continuing involvement, and the part it no longer recognises on the basis of the relative fair values of those parts on the date of the transfer. The difference between the carrying amount allocated to the part that is no longer recognised and the sum of the consideration received for the part no longer recognised and any cumulative gain or loss allocated to it that had been recognised in other comprehensive income is recognised in profit or loss. A cumulative gain or loss that had been recognised in other comprehensive income is allocated between the part that continues to be recognised and the part that is no longer recognised on the basis of the relative fair values of those parts.

3.15 Financial liabilities

Financial liabilities are recognised when the Group becomes party to the contractual provisions of an instrument and are initially recognised at fair value adding transaction costs.

Financial liabilities (including borrowings and trade payables) are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the net carrying amount on initial recognition.

3.15 Financial liabilities (continued)

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or they expire. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

3.16 Other receivables and liabilities

Accrued items and other non-financial assets and liabilities are carried at cost. They are charged/credited to profit or loss according to performance of the underlying transaction.

3.17 Government grants

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received. The benefit of a government loan at a below-market rate of interest is treated as a government grant, measured as the difference between proceeds received and the fair value of the loan based on prevailing market interest rates. Government grants relating to property, plant and equipment are treated as deferred revenue and released to profit or loss over the expected useful lives of the assets concerned.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

3.18 Inventories

In accordance with IAS 2 (Inventories), inventories encompass assets held for sale in the ordinary course of business (finished goods and goods purchased for resale), in the process of production for such sale (work in process) or in the form of materials or supplies to be consumed in the production process or in the rendering of services (raw materials and supplies). Inventories are stated at the lower of cost and net realizable value. The net realizable value is the achievable sale proceeds under normal business conditions less estimated cost to complete and selling expenses. Costs of inventories are determined on a first-in-first-out basis.

3.19 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

3.19.1 Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit as reported in the consolidated statement of profit or loss and other comprehensive income because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

3.19.2 Deferred tax

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit. For any temporary differences arising on business combinations where the Group can control the reversal of the temporary difference and it is not expected to reverse in the near future, the deferred tax asset/liability is not recognised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered. Deferred tax liabilities and assets are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realised, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

3.19.3 Current and deferred tax for the year

Current and deferred tax are recognised in profit or loss, except when they relate to items that are recognised in other comprehensive income or directly in equity, in which case, the current and deferred tax are also recognised in other comprehensive income or directly in equity respectively. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

3.20 Discounting

Where the effect of the time value of money is material, balances are discounted to present values using appropriate rates of interest. The unwinding of the discounts is recorded in finance income and finance costs.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

3.21 Noncurrent asset held for sale

Non-current assets are classified as assets held for sale and stated at the lower of their previous carrying amount and fair value less costs to sell if their carrying value is to be recovered principally through a sale transaction rather than through continuing use. The condition of being recovered through sale is only met when: "the sale is highly probable, the non-current asset is available for immediate sale in its present condition, management is committed to the sale and the sale is expected to qualify for recognition as a completed sale within one year from the date of classification."

3.22 Borrowing costs

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the borrowing costs eligible for capitalisation. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

3.23 Dividends

Dividends are recognised as a liability in the financial statement in the year in which the dividend is approved by the shareholders.

3.24 Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Chief Executive Officer.

3.25 Earnings per share

Earnings per share are calculated by dividing profit for the year by the number of ordinary shares outstanding during the period. Diluted earnings per share are calculated by dividing profit for the year by the fully-diluted number of ordinary shares outstanding during the period.

4. Critical accounting judgements and key sources of estimation uncertainty

In the application of the Group's accounting policies, which are described in note 3, the directors are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

4.1 Critical accounting judgement

The following are the critical judgements and estimates that the directors have made in the process of applying the Company's accounting policies and that have the most significant effect on the amounts recognised in financial statements.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

4.1.1 Revenue recognition

In the application of the Group's policy that states that revenues are recognized when significant risks and rewards has been transferred to the buyer, Management has ensured that revenues are recognised when goods are delivered to Customers. When goods remain in the Company's facility as a result of delayed transportation arrangement by the Customer, the Customers are aware based on practice and signed contract notes that the risks and reward of such goods remain with them.

4.1.2 Indefinite useful life of Intangible assets

During the year, the directors reconsidered the recoverability of the Group's intangible asset (trade mark) and assessed if the useful life is still indefinite, the trademark conveys an irrevocable right of use to the Company. Management's assessment for recoverability includes active sales from the products, competition and current market share of the products, it is believed that the asset is fully recoverable.

4.2 Key sources of estimation uncertainty

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

4.2.1 Useful life of Property, Plant and Equipment

Property plant and equipment represent the most significant proportion of the asset base of the Company, accounting for over 60 % of the Company's total assets. Therefore the estimates and assumptions made to determine their carrying value and related depreciation are critical to the Company's financial position and performance and have been properly done.

The charge in respect of periodic depreciation is derived after determining an estimate of an asset's expected useful life and the expected residual value at the end of its life. Increasing an asset's expected life or it's residual value would result in the reduced depreciation charge in the profit or loss.

The useful lives and residual values of the of property, plant and equipment are determined by management.

4.2.2 Allowance for doubtful receivables

Judgment is exercised to make allowance for trade receivables doubtful of recovery by reference to the financial and other circumstances of the debtor in question. Based on the credit terms and experience regarding trade receivables, the Company makes full impairment allowance for doubtful debt of over 360 days

4.2.3 Allowance for obsolete inventory

Management continuously assesses inventory items for obsolescence based on the standard operating practice of the Company.

4.2.4 Fair valuation of loan

To obtain the fair value of a loan obtained at below market interest rate, the Group used a valuation technique that include inputs that are based on observable market data Management believes that the key assumptions used in the determination of the fair value are appropriate.

MAY & BAKER NIGERIA PLC

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

6.3 Segment accounting policies

The accounting policies of the reportable segments are the same as the Group's accounting policies described in note 3. Segment profit represents the gross profit earned by each segment without allocation of central administration costs and directors' salaries, selling, marketing and distribution expenses, other operating income, finance costs and income tax expense. This is the measure reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance.

6.4 Segment assets and liabilities

The Chief Executive Officer does not assess segment performance based on reports on segment assets and liabilities.

6.5 Information about major customers

There are no customers that represent more than 10% of the total revenue of any of the reported segments.

Geographical information

The Group operates in Lagos and West, East and North principal geographical areas. The Group's revenue from continuing operations from external customers by location of operations are as follows:

	Revenue from External Customers March 2026 N'000	The Group Revenue from External Customers December 2025 N'000	Revenue from External Customers March 2025 N'000	Revenue from External Customers March 2026 N'000	The Company Revenue from External Customers December 2025 N'000	Revenue from External Customers March 2025 N'000

Total trade and other receivables	3,320,116	2,369,836	1,970,887	3,034,505	2,361,454	2,054,191

21.3 Trade receivables

Trade and other receivables disclosed above are carried at cost less allowance for doubtful debts.

The average credit period taken on sales of goods is between 30-45 days. No interest is charged on the overdue receivables. The Group has recognised an allowance for doubtful debts of 100% against all receivables over 360 days(excluding public sector and Institutions) because historical experience has been that receivables that are past due beyond 360 days may be doubtful of recovery. In most cases these debts are recovered.

Before accepting any new customer, the company uses an internal credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. The internal credit scoring system are constantly reviewed.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

	The Group			The Company		
	March 2026	December 2025	March 2025	March 2026	December 2025	March 2025
	N'000	N'000	N'000	N'000	N'000	N'000
21. Trade and other receivables (Cont'd)						
Ageing of receivables:						
0-30 days	1,232,447	552,769	310,638	924,385	493,412	193,928
31-60 days	579,126	571,728	523,341	511,756	531,799	446,264
61-90 days	257,233	253,985	400,584	232,229	209,572	323,890
91-150 days	340,730	422,575	243,369	329,024	362,125	216,879
150-360 days	246,326	157,910	164,085	212,626	143,492	145,723
Over 360 days	315,685	327,206	387,814	268,223	297,317	344,666
Total	2,971,546	2,286,174	2,029,830	2,478,242	2,037,716	1,671,349

In determining the recoverability of a trade receivable the Group considers any change in the credit quality of the trade receivable from the date credit was initially granted up to the reporting date. The concentration of credit risk is limited due to the customer base being large and unrelated.

	3,141,241	2,301,540	3,928,807	2,960,170	2,152,588	3,873,017

Trade creditors and accruals principally comprise amounts outstanding for trade purchases and ongoing costs. The average credit period taken for trade purchases is 45 days. For most suppliers no interest is charged on the trade payables from the date of the invoice. The company has financial risk management policies in place to ensure that all payables are paid within the pre-agreed credit terms.

The directors consider that the carrying amount of trade payables approximates to their fair value.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

32.3 Financial risk management objectives

The company's Corporate Treasury function provides services to the business, co-ordinates foreign exchange transactions, monitors and manages the financial risks relating to the operations of the company through internal risk reports which analyses exposures by degree and magnitude of risks. These risks include market risk (including currency risk and interest rate risk), credit risk and liquidity risk.

Market risk

The Company's exposure to variations in foreign exchange rate and interest rates are minimal and the Company is not expected to be exposed to these risks at a higher than minimal level.

32.4 Foreign currency risk management

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in foreign exchange rates. The Group's exposure to the risk of changes in foreign exchange rates is minimal as the Group's borrowing activities are in local currency and trade customers are billed in Naira. Exposure to foreign exchange risk only relates to purchase of operating materials (e.g. raw materials and specialised products) abroad, this is minimised by restricting imports to circumstance where no local alternative exist. The Group makes use of letter of credit facilities to transact with foreign suppliers.

	March 2026	March 2025
Exposure to foreign currency		
Bank account		
In US Dollars	181,632	518,736
In Euros	3,674	3,552
In GBP	752	752
	<u> </u>	<u> </u>
	<u> </u>	<u> </u>

The Group is not materially exposed to foreign currency changes as most of trading transactions and borrowing activities are denominated in Naira.

32.5 Credit risk management

Credit risk is the risk that a counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss.

The Group is exposed to credit risk from its operating activities (primarily for trade receivables) and from its financing activities, including deposits with banks and financial institutions.

	The Group		The Company	
	March 2026	March 2025	March 2026	March 2025
	N'000	N'000	N'000	N'000
Exposure to credit risk

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

32.5.1 Trade receivables

Customer credit risk is managed by each business unit subject to the Group's established policy, procedures and control relating to customer credit risk management. Credit quality of the customer is assessed based on an extensive credit rating scorecard and individual credit limits are defined in accordance with this assessment. A sales representative is attached to each customer and outstanding customer receivables are regularly monitored by the representative. The requirement for an impairment is analysed at each reporting date on an individual basis for major customers, additionally, a large number of minor receivables are grouped into homogenous groups and assessed for impairment collectively. The calculation is based on actual incurred historical data. The maximum exposure to credit risk at the reporting date is the carrying value of each class of financial assets.

Collateral and other credit enhancements

The Group does not hold any collateral or other credit enhancements from customers. On a case by case basis the group creates a legal right of offset against any amount owed by the group to the counter party.

Concentration risk

The Group evaluates the concentration of risk with respect to trade receivables as low, as its customers are located in several jurisdictions and industries and operate in largely independent markets.

There are no customers during the current reporting period that represents more than 5% of the total trade receivables.

32.5.2 Other receivables

This is mainly from due from related companies. The Group's financial controller continuously monitors and reviews the receivables.

32.5.3 Deposits with banks and other financial institutions

Credit risk from balances with banks and financial institutions is managed by the Group's treasury department in accordance with the Group's policy. Surplus funds are spread amongst reputable commercial banks and funds must be within credit limits assigned to each counterparty. Counterparty credit limits are reviewed by the Group's financial controller periodically and may be updated throughout the year subject to approval of the Group's Chief Executive Officer. The limits are set to minimise the concentration of risks and therefore mitigate financial loss through potential counterparty's failure. The Group's maximum exposure to credit risk for the components of the statement of financial position is its carrying amount.

32.6 Liquidity risk management

The Group monitors its risk to a shortage of funds by maintaining a balance between continuity of funding and flexibility through the use of bank overdrafts, bank loans and by continuously monitoring forecast and actual cash flows and by matching the maturity profiles of financial assets and liabilities. It also ensures that short term funds are used strictly for working capital purposes while capital projects are funded from long tenored borrowings. Access to sources of funding is sufficiently available.

MAY & BAKER NIGERIA PLC

NOTES TO THE UNAUDITED CONSOLIDATED FINANCIAL STATEMENTS FOR THE PERIOD ENDED 31ST MARCH, 2026.

33. Guarantees and other Financial Commitments

Charges on assets

May & Baker Nig Plc RC. 558

CERTIFICATION PURSUANT TO SECTION 60(2) OF INVESTMENT AND SECURITIES ACT NO. 29 OF 2007 – QUARTERLY REPORT

We the undersigned hereby certify the following with regards to our first quarter financial report for the period ended 31 January 2026 that:

- (a) We have reviewed the report;
- (b) To the best of our knowledge, the report does not contain:
 - (i) Any untrue statement of a material fact, or
 - (ii) Omit to state a material fact, which would make the statements, misleading in the light of the circumstances under which such statements were made;
- (c) To the best of our knowledge, the financial statement and other financial information included in the report fairly present in all material respects the financial condition and results of operation of the company as of, and for the periods presented in the report.
- (d) We:
 - (i) Are responsible for establishing and maintaining internal controls.
 - (ii) Have designed such internal controls to ensure that material information relating to the company is made known to such officers and others within those entities particularly during the period in which the periodic reports are being prepared;
 - (iii) Have evaluated the effectiveness of the company's internal controls as of date and within 90 days prior to the report;
 - (iv) Have presented in the report our conclusions about the effectiveness of our internal controls based on our evaluation as of that date;
- (e) Although these reports have not been audited, we have taken care to review:
 - (i) All significant deficiency in the design or operation of internal controls which would adversely affect the company's ability to record, process, summarize and report financial data;
 - (ii) Any fraud, whether or not material, that involves management or other employees who have significant role in the company's internal controls;
- (f) We have identified in the report whether or not there were significant changes in internal controls or other factors that could significantly affect internal controls subsequent to the date of our evaluation, including any corrective actions with regard to significant deficiencies and material weaknesses.
